

Lima South Quarry utilises an Environmental Management System providing a systematic and documented approach to the planning and implementation of environmental procedures to ensure that our work practices, employees' awareness, and training meet Australian legislation, standards, industry codes, and expectations of interested parties commensurate with our operations.

Our Environmental Policy is defined and strongly driven by the following management principles and behaviours.

- Implement and maintain a structured Environmental Management System consistent with ISO14001:2015 compliant with relevant Australian Federal and State Government environmental legislation, regulations and policies,
- Compliance with EPA License requirements through monitoring and reporting,
- Drive continual improvement and innovation based upon efficient business processes, well-defined monitoring, and industry best practices,
- Develop staff competencies, creativity, empowerment, and accountability through appropriate development programs and driven by strong management involvement and commitment,
- Provide a balanced approach to Climate Change effects versus increasing demand for materials.
- Application of continuous improvement to reduce air, water, noise, and light pollution from our operations and mitigate impacts on the environment and local community.
- Minimize our waste and the development of processes for reuse or recycle.

This Environmental Policy and Management System procedures will be reviewed annually for suitability, adequacy and effectiveness driving continual improvement or when required by changes in legislation, standards, industry codes, or company operations.
